

Disclaimer

Exclusion of Liability

The German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig does not assume any liability for the particular currency, accuracy, completeness and quality of the provided information. iDiv shall not be liable for damage of a tangible or intangible nature caused through the use or failure to use the information offered and/or through the use of faulty or incomplete information unless it is verifiably culpable of intent or gross negligence. All offers are subject to change and non-binding. iDiv reserves explicitly the right to modify, to supplement or to delete any or all information on its website, or to temporarily or permanently cease publication thereof without separate announcement.

Liability for Contents

The information herein has been created with utmost care. However, we cannot assume any liability for the particular accuracy, completeness and currency. As service provider, we are responsible according to § 7 para 1 TMG (Tele Media Act) for own contents on these websites under the general laws. According to §§ 8 to 10 TMG, as service provider, we are not required to monitor transmitted or stored foreign information or to investigate circumstances that indicate illegal activity. The obligation to remove or block the use of information under the general laws remains unaffected by this. However, any liability is only possible from the date of knowledge of a specific infringement. Upon gaining knowledge of such violations, we will remove this content immediately.

Liability for Links

The information offered by us contains cross-references to external websites by third parties. As we have no control on their content, we do not assume any responsibility for this foreign information. Solely the particular operator or provider of the foreign internet offer is liable for the content of these websites. Upon initial linking we have checked the foreign websites for any possible violations of law. Illegal contents were not apparent at the time of linking. A permanent control of the linked websites is unreasonable without concrete evidence of violation. Upon gaining knowledge of such violations, we will remove this link immediately.

Copyright

The created contents and works provided on these pages by the operators of these sites are subject to the German copyright law. Reproduction, adaptation, dissemination and any kind of exploitation outside the limits of the copyright law require the written consent of the author or creator. Downloads and copies of these pages are only permitted for private, non-commercial use. Insofar as the content used on this website was not created by the operator itself, the copyright of the third party is respected. Third party contributions are marked as such. If, nevertheless, a violation of copyright should come to your attention, we ask you for a corresponding notice. Upon gaining knowledge of such violations, we will remove this content immediately.

Privacy

It is generally possible to use our website without having to provide any personal data. If, in individual cases, personal data is imposed (for example name, address or email address), the disclosure of this data by the user is, as far as possible, on a voluntary basis. These personal data will not be transferred to a third party without your prior consent.

We would like to point out that data transmission on the internet (particularly via email) is essentially unsecure. It is not guaranteed that transmitted data cannot be read or falsified by unauthorized third parties.

We hereby expressly prohibit the use of contact data published in the context of website legal notice requirements with regard to sending promotional and informational materials not expressly requested. The website manager reserves the right to take specific legal action if unsolicited advertising material, such as email spam, is received.

Integration of Social Media Platforms

Visiting our website will not result in the disclosure of your personal data to social media platform operators. Our website only contains passive links to Twitter, LinkedIn and Research Gate. Your personal information will only be transmitted to the social media platform if you choose to actively click a link and thereby open the relevant social media website.

The purpose and scope of the social media platform operator's data collection, the further on-site processing and use of your data as well as your rights and potential settings to protect your personal information are explained in the relevant social media platform operators privacy policy.

European Commission and Research Executive Agency

This website reflects only the author's view and the Research Executive Agency and the European Commission are not responsible for any use that may be made of the information it contains.
